PROFESSIONAL SUMMARY

BCA graduate with hands-on project experience in Python, SQL, Pandas, NumPy, HTML, CSS, Flask, REST API, data analysis, data visualization, statistics, Scikit-learn, machine learning, artificial intelligence, NLP, and Retrieval-Augmented Generation (RAG). Developed projects in recommendation systems, data analysis, AI image generation, machine learning prediction, and RAG chatbots. Seeking an entry-level Python, Data Science, Machine Learning, AI, or IT role.

EDUCATION

Bachelor of Computer Applications (BCA)

Seth Motilal PG College, Jaipur, Rajasthan

TECHNICAL SKILLS

Programming: Python, PowerShell

Data Analysis: Pandas, NumPy

Database: SQL

Data Visualization: Matplotlib, Seaborn, Data Visualization

Statistics: Statistics, Descriptive Statistics

Machine Learning: Machine Learning, Scikit-learn (sklearn), Regression, Classification, KNN, Logistic Regression

Web Development: HTML, CSS, Flask, REST API

Data Science: Data Science & Machine Learning (DSML)

Artificial Intelligence: Artificial Intelligence, NLP, Retrieval-Augmented Generation (RAG)

Tools: Jupyter Notebook, VS Code

PROJECTS

Movie Recommendation System

- Developed a movie recommendation system using Python and data analysis techniques to process movie data and suggest relevant movies based on user preferences.

AmbitionBox Data Analysis

- Built a data-driven project focused on company and employee-related information, using Python, Pandas, NumPy and data analysis techniques to organize and derive insights from the dataset.

AI Image Generator

- Developed an AI-based image generation application that creates images from user-provided text prompts, integrating AI concepts with a user-friendly application workflow.

Diabetes Prediction System

- Built a machine learning-based web application using Python and Flask to predict diabetes risk from user-provided health-related inputs. Applied a classification model and connected the trained model with a web interface.

AI-RAG Chatbot

- Developed a Retrieval-Augmented Generation (RAG) chatbot that retrieves relevant information and uses it to generate context-aware responses, combining retrieval and generative AI concepts.

SOFT SKILLS

Problem Solving, Communication, Teamwork, Quick Learner
